PROFESSIONAL SUMMARY

Senior Flutter Developer and Mobile Team Lead with 7+ years of mobile development experience delivering production applications across fintech, real estate, healthcare, tourism, education, e-commerce, and media. Strong background in Flutter/Dart, scalable architecture, state management, real-time communication, Firebase, third-party SDK/API integrations, payments, analytics, performance optimization, and end-to-end mobile delivery. Experienced in leading mobile development, sprint execution, code reviews, and cross-functional collaboration.

PROFESSIONAL EXPERIENCE

Senior Mobile Application Developer 09/2025 – Present
Dahab Zaman Egypt Egypt

- Developed and maintained a production financial trading application for buying, selling, and monitoring physical gold and commodities across iOS and Android.
- Implemented real-time gold price updates and synchronized market data across home, product details, portfolio/bag, and trading-product screens.
- Developed Market Watch, interactive price charts, trading-product flows, account information, and localized user experiences.
- Integrated secure eKYC and identity-verification capabilities to support digital customer onboarding.
- Implemented push notifications and real-time event handling, and improved background/foreground data synchronization, performance, and production stability.
- Contributed to production debugging, release delivery, and ongoing maintenance of the Dahab Zaman Egypt mobile application.

Senior Flutter Developer 02/2023 – 08/2025
Skyloov Property Portal (UAE) Dubai, United Arab Emirates

- Led a mobile development team to design and deliver the Skyloov Property Portal app, a large-scale real estate platform for property discovery and listing.
- Built and optimized cross-platform iOS and Android experiences using Flutter, with emphasis on scalable architecture, performance, stability, and maintainability.
- Developed real-time chat, live tracking, and event pipelines to provide instant user updates and support real-time interactions.
- Integrated "Sylvia", an AI-powered assistant using NLP and API integrations to enable conversational property search and real-time assistance.
- Integrated third-party 360-camera SDKs for immersive property visualization and interactive 360-degree browsing.
- Implemented AppsFlyer, Cloudflare Zaraz, and Smartlook integrations for attribution, analytics, event tracking, and product optimization.
- Managed sprints, participated in architecture decisions, performed code reviews, and collaborated across product and engineering teams to maintain delivery quality.

Senior Flutter Developer 08/2020 – 01/2023
Ryalto (UK) London, United Kingdom

- Developed and maintained Flutter applications for iOS and Android serving healthcare professionals.
- Implemented real-time messaging, group chats, VOIP, video calling, and shared calendars using WebRTC.
- Integrated Firebase for real-time data, notifications, and backend services, and designed push-notification flows for alerts and scheduling updates.
- Delivered posts, comments, activity feeds, shift discovery, and booking features within a secure and scalable mobile architecture.

- Worked closely with product managers and cross-functional teams in an Agile/Scrum environment to deliver production features on schedule.

Flutter Developer 01/2019 – 07/2020
Green Code (KSA) Dammam, Saudi Arabia

- Developed native and cross-platform mobile applications using Flutter for iOS and Android across tourism and education products.
- Implemented real-time chat, e-commerce payments, educational content, marketing integrations, and SMS/phone authentication.
- Integrated Firebase, payment gateways, analytics/tracking solutions, third-party APIs, and SDKs.
- Applied scalable architecture and design patterns to improve maintainability, application performance, stability, and consistent UX.
- Used Jira and Agile/Scrum practices for sprint planning, task tracking, collaboration, and delivery.

Flutter Developer 03/2018 – 03/2019
Freelance

- Designed and delivered custom Flutter applications for iOS and Android across the full mobile development lifecycle.
- Contributed from requirements and UI/UX implementation through development, performance optimization, and release.

CORE TECHNICAL SKILLS

Flutter & Mobile
Flutter (Dart), iOS (Swift/SwiftUI), Android (Kotlin/Compose), React Native (JavaScript/TypeScript)

Backend & Integrations
REST/API & SDK integrations, GraphQL, Firebase, WebRTC, payment gateways, push notifications, real-time systems, Offline first

Architecture & State Management
Clean Architecture, Clean Code, SOLID, OOP, BLoC, Riverpod, Provider, GetX, MVVM, MVC, Redux, Zustand, TanStack Query

Engineering & Delivery
Git, unit testing, debugging, CI/CD, Jira, Agile/Scrum, code reviews, performance optimization, AWS, Azure, GCP, Docker

EDUCATION & LANGUAGES

Bachelor Degree in Computer Science and Information Systems
Faculty of Computers and Informatics, Suez Canal University
Languages: Arabic (Native) | English (Proficient)

SELECTED PROJECTS

Dahab Zaman Egypt
Gold Trading & Financial Platform
Production Flutter application for buying, selling, and monitoring physical gold and commodities, featuring real-time prices, Market Watch, charts, eKYC, push notifications, and trading experiences across iOS and Android.

Skyloov Property Portal
360 Real Estate Platform
Delivered interactive 360 browsing, optimized search and UI/UX, AI-assisted conversational property search, analytics integrations, and scalable real-time marketplace experiences.

Ryalto
Healthcare Communication & Shift Booking
Built secure communication, real-time messaging, group chat, in-app voice calling, organizational updates, wellbeing content, and shift discovery/booking capabilities.

Fashion Frame AI
AI-Powered Personal Stylist
AI-powered digital wardrobe, personal styling, virtual try-on, and outfit planning.
